EDUCATION

Fordham University, *New York, NY*

Ph.D., Economics (Econometrics & Quantitative Economics)	2018 – Present
M.A., Economics (*summa cum laude*)	2019

Montclair State University, *Montclair, NJ*

B.A., Economics (*magna cum laude*)	2018

RESEARCH INTERESTS

Macroeconomics, Behavioral Economics, Fiscal & Monetary Policy

RELEVANT POSITIONS HELD

Fordham University, *New York, NY*

Graduate Student Coordinator	Jan 2020 – Present
Graduate Assistant	Aug 2018 – Dec 2019

DiMassimo Goldstein, *New York, NY*

Growth Strategy and Data Analyst	Sep - Dec 2019

TIAA, *New York, NY*

Consultant for Macro & Country Risk	Oct - Dec 2017, Aug 2018
Enterprise Risk Management Intern	Summer 2017

Summit Prep, *Summit, NJ*

Director of Account Management	Aug 2015 - Dec 2016

United Nations Association of El Salvador, *New York, NY*

Special Advisor on Economy for Sustainable Development	June 2018

RESEARCH PAPERS

DSGE Modeling with Cognitive Discounting, *In progress*
This paper aims to determine whether expectations formation through a bounded rationality assumption affects the empirical conclusions of a standard DSGE model and if it provides a better fit to US economic data than under rational-expectations. Bounded rationality is in the form of cognitive discounting, or "myopia", which quantifies how people pay less attention to events occurring further in the future. I use a Bayesian likelihood approach to compare the distribution of model parameters for when people are fully rational and for when they are myopic.

On mental health impacting the odds of earnings mobility, evidence from the USA, *In progress*
Does the presence of mental illness impact expected earnings across age? I propose a project to use the National Comorbidity Survey 2 (NCS2) data to find the probability of mobility between different earning brackets for individuals who are endorsed for mental illnesses. I create a multinomial logistic model to estimate the odds of mobility between earning brackets attributed to mental illness and age
